

MATTRESS TO GO

Crib	27" x 52"
Twin	39" x 74"
Full	54" x 74"
Queen	60" x 80"
King	76" x 80"

Twin XL **39" x 80"**
Common for adjustable beds and for adults and taller children.

Full XL **54" x 80"**
Not as common – usually used when the room dimensions do not permit a queen. Use queen size sheets for this bed to save money.

California King **72" x 84"**
A special size made to fit in a king waterbed platform (72" x 84"). This fits snugly and most brands make this size. It is what we recommend for customers replacing their fluid king waterbed with an innerspring item.

Super Single Innerspring **46" x 82"**
Innerspring mattress made to fit in the waterbed platform that is 48" x 84".

Waterbed Innerspring Queen **58" x 82"**
This is an uncommon size made to fit in a queen waterbed platform (60" x 84"). It does tend to slide around a bit in the waterbed box and sheets are harder to find. We recommend using a regular queen in this situation. Sheets are easy to find, it will fit snugly in the waterbed box and if the waterbed box is discarded a queen box spring is easily purchased to go with the mattress to make a traditional queen set.

Waterbed Innerspring King **70" x 82"**
Again, an odd size not made by many companies where the customer does not want the mattress to fit snugly in the king waterbed platform (72" x 84"). We do not recommend this size.

RV Queen **60" x 74"**
When an RV or trailer has a queen, it is almost always a "short queen" because of the size limitations of the RV.

¾ Bed **48" x 74"**
¾ Bed - Short **48" x 72"**
These are antique mattresses. The 74" length is the common size, but some were made shorter. ALWAYS double check the measurements on this bed.

FLUID MATTRESS SIZES

Waterbed Super Single	48" x 84"
Waterbed Queen	60" x 84"
Waterbed King	72" x 84"
Softsider Waterbeds	Same dimensions as their innerspring counterparts

Softsider boxes are usually flat wood platforms that may be used with an innerspring mattress. However, a few brands had boxes with concave surfaces or a thick lip around the perimeter that would prohibit their use with an innerspring mattress.
