

HERE WE GO...

You probably noticed the mattress is pretty heavy so you might want to grab a partner to help with the set up.

If you'd like to watch a video to see how it's done, please visit: www.thebeddinggroup.com/bibvideo

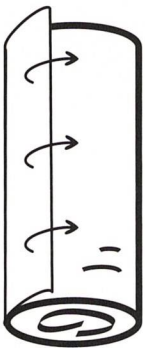

STEP 1 - UNBOX

Unpack your Therapedic mattress in the room where you plan to sleep on it. Lay the box on its side and slide the mattress out of the box.

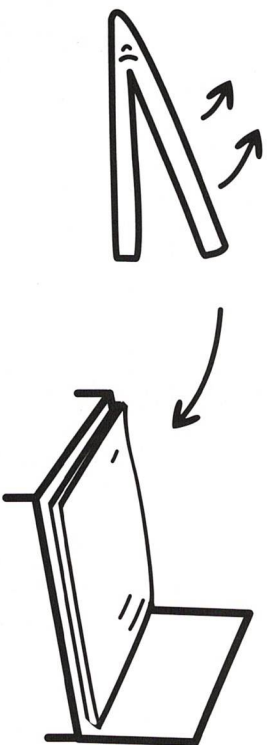

STEP 2 - UNWRAP & UNROLL

Find the plastic flap on the side of the packaged mattress, pull it from its seal and unwrap the outer plastic by unrolling the mattress. The mattress will still stay compressed.

STEP 3 - UNFOLD & POSITION

Unfold the mattress and position it on the bed.

STEP 4 - REMOVE

Using the handy cutting tool provided, carefully cut the plastic being sure to avoid the mattress upholstery. Watch it rise and remove the plastic. It could take 24 hours or so to come to full life.

STEP 5 - ENJOY

Sleep well on your new Therapedic mattress!

SWEET DREAMS!
